Programming Languages

C, C++, Python, SQL

Front-end Technologies

HTML, CSS, Tailwind CSS, JavaScript, React.js

Back-end Technologies

Node.js, Express.js, MongoDB

Developer Tools

VS Code, Git & GitHub, Postman

PROJECTS

Bookie Website

Web Project

Developed an online platform called "Bookie" where users can browse, read, and purchase books. The website allows users to access a vast collection of books online, with options to either read directly on the platform or purchase for offline reading.

Nearest Shop

Graduation Project

Developed an application and website called "Nearest Shop" where users can discover and explore nearby shops based on their location. The app provides a seamless experience with real-time, personalized recommendations and detailed information about stores, helping users find the best shopping options close to them.

Hey! Client

Chat Application

Developed a chat application using Python, where multiple users can connect to a server and communicate in real-time. The application leverages Python's (Socket) module for network communication and the (Threading) module to handle multiple clients simultaneously.
